Profile

A skilled and dedicated Web Developer with a passion for creating exceptional user experiences, I bring a diverse set of technical skills and expertise to the table. My proficiency in web development, front-end design, and a range of programming languages, including HTML, CSS, JavaScript Bootstrap, React, Nextjs allows me to craft visually appealing, responsive, and efficient websites and applications.

Education

Engineering, *Thadomal Shahani College of Engineering*   2022 – 2026
Mumbai, India

Skills

Front-End: html,css,js,bootstrap,react,Nextjs,   **programming:** c,java,js

Data-Base: Mongodb,Firebase   **Backend:** node js, express js, mongoose

Key Projects

SaaS Platform
Developed an AI-driven platform for booking appointments, processing payments, and managing customer interactions with real-time chat, Stripe integration, and a customizable interface with help of tech stack of next js ,typescript,bun

Ecommerce website
Building an eCommerce site with HTML, CSS, JavaScript, EJS, and MongoDB taught me to create responsive designs, implement dynamic content rendering, manage product and user data, handle CRUD operations, and ensure secure and efficient database management.

Food delivery
Creating a food delivery website with React.js, TypeScript, and MongoDB taught me to build responsive UIs, manage state, and ensure type safety. I learned backend database management, RESTful API development, and handling authentication. This experience emphasized scalability, performance, and security, preparing me for robust web application development.

Zoom Clone
Building a Zoom clone with the Steam API, Next.js, and MongoDB teaches real-time communication, API integration, and full-stack development. You'll handle user authentication, build responsive UIs, manage databases, optimize performance, and ensure security. It also covers deployment and project management, providing a holistic development experience.

Courses

Apna College Web Development, Harkirat Cohert
